THE BACKGROUND

In the 21st century, humanity faces its most dire threat. An alien horde led by the Supreme Commander Vile Malmart, has launched a full scale invasion of the planet Earth. An Astrotube connects the desolate remains of New York City to the orbiting space station of the invaders. Their armies sweep the skies for any sign of resistance...

The last hope for mankind comes from a secret alliance made by the President. Luckily, he was informed of the coming invasion in time to act. He assembled the world's greatest scientists and gave them the impossible task of finding a solution to the dilemma. From their labs came their answer, the **Special Cybernetic Attack Team**.

These part human, part machine warriors are capable of wielding massive destructive force for their compact size. The members of **S.C.A.T.** have been designed to capture and adapt alien technology and weapons and use them against the invaders. Together, they may have the power to defend the Earth.

STARTING THE GAME

Insert the Game Pak into the Nintendo Entertainment System and turn the machine on. The title page appears with the option for a one or two player game. Press the **SELECT** button to the desired game, then press **START**. For a one player game you get the choice of either **S.C.A.T.** member. For a two player game, the person with controller #1 plays Arnold and controller #2 has Sigourney. After these selections have been made (by pressing **START**) the game begins.

CONTROLLING THE WARRIORS

Pressing **UP**, **DOWN**, **LEFT** or **RIGHT** on the control pad moves the character in those directions.

Pressing the **B** button fires your weapon. Some weapons fire continuously if the **B** button is constantly pressed.

Pressing the **A** button locks and unlocks the firing position of the twin satellites that are part of the warriors armament. These items maneuver around the fighters unless they are locked by the player.

The **START** button pauses the game.

SPECIAL ITEMS

To obtain the alien armament, the player must destroy the Item Enemy. After doing so, a letter appears denoting the item's use.

These items are:

- S- Speed.** The player's maneuverability increases. The more Speed items collected, the faster the warrior moves.
- L- Laser.** This high powered beam cuts with amazing strength. Hold the **B** button for continuous fire. This weapon can shoot through some walls.
- W- Wide beam.** This weapon can take out multiple enemies in a single burst.
- B- Bomb.** These explosive shells have the concussive force to knock out powerful enemies.
- R- Recover.** This item restores lost energy points to the player that collects it.
